

BeeSafe™ 7-0-2

Organic Fertilizer

BeeSafe™ 7-0-2 is a novel specialty fertilizer, which simultaneously supports soil health and plant nutrition. This protein hydrolysate based formulation contains select strains of highly beneficial soil microorganisms, kelp extract, molasses and humic acid.

BeeSafe™ 7-0-2 is a comprehensive plant growth system specifically formulated to stimulate growth, enhance plant vigor and revitalize soil biology through the introduction of beneficial microbial species.

BeeSafe™ 7-0-2 incorporates a number of beneficial bacteria that have the capacity to solubilize phosphate in the soil profile. These select microbial species release a variety of metabolites (organic acids & enzymes) into the soil, which convert insoluble phosphate into plant available forms. This synergistic blend of ingredients stimulates a series of positive feedback mechanisms whereby the sum total of the system is greater than the individual components that comprise it.

Application and Mixing Specifics: Shake product thoroughly prior to each use. Do not pre-mix more product than you will utilize in a 24 hour period. For optimum results use a spray mixture that has a pH of 5 - 9. Utilize a sufficient volume of water to achieve desired coverage we recommend a minimum of 2 gallons per 1000 sq ft / 8 liters per 100 sq. meters. When using the product into a rotation that includes insecticides, herbicides and fungicides we recommend you apply 48 hours after application of pesticide to reestablish beneficial microbial populations. Product may be applied to both soil and foliage. Spray plant thoroughly until point of runoff when applying to foliage.

STORAGE & HANDLING

Store product in original container with cap tightly secured. Store in a cool area (40° – 110° F.) out of direct sunlight. Moderately irritating to eyes avoid contact. If contact occurs flush eyes with cool water for 15 minutes and consult physician if irritation persists. Do not ingest. If swallowed drink copious amounts of water and contact physician. Wash your hands thoroughly after handling product. Please refer to MSDS Sheet for more detailed information.

Available In:
275 gallon tote
55 gallon drum
30 gallon drum
5 gallon pail

Application Rates

	QUANTITY	COVERAGE	FREQUENCY
High Profile Turf	6 – 12 oz	1000 sq ft	To coincide with growth cycles
Residential Turf	5 - 9 oz	1000 sq ft	To coincide with growth cycles
Flowering	4 ½ - 6 oz	1000 sq ft	Every 4 weeks or as required
Evergreens,	3 – 4 ½ oz	1000 sq ft	3 times per year
Deep Root Feeding	2 gal per 250 gal water	1 gal per 5 feet	Twice a year
Hydro Seeding	9 oz	1000 sq ft	At time of seeding
