

The Future

NEXT EXIT 

How to Grow Less Expensive Turf/Grass while Making it Better

Sometimes a step backwards is progress

Concentrated Mother Nature

SumaGrow key consortium of microbes contained in Earthcare Natural.

SumaGrow is **NOT** Genetically Modified

SumaGrow is **NOT** a fertilizer

SumaGrow is **NOT** a growth hormone

SumaGrow is **NOT** a compost tea

Benefits for Turf

- **Costs less than fertilizer – price stability**
- **Increase water efficiency / Drought resistant**
- **Makes herbicides more efficient**
- **Reduces usage of insecticides**
- **Easy to Use / Easy to Store**
- **Does well in shade**
- **Faster/higher germination rates**
- **Better for the environment / no license required**

Insect Control

Modes of Action

Healthier Plants – attract fewer insects

Higher Brix levels – kill insects

Quorum Sensing – plant/microbe communication

**“This collaboration [with
Novozymes] immediately elevates
microbials as the next major
platform in agriculture that will
elevate yield and productivity
beyond the seed itself.”**

**Hugh Grant
CEO**

Monsanto
